

## POSTDOCTORAL POSITION

Vector biology / microbiology / functional genomics

POSTDOCTORAL POSITION AVAILABLE for a highly motivated individual to study mosquito – pathogen – microbiota interactions and genetics using state-of-the-art functional genomics approaches, infection assays, genome editing and interaction studies. The postdoctoral scientist will have considerable freedom to develop related research projects according to his/her interests.

Expertise and aptitude in at least some of the following areas is essential: molecular biology, entomology, microbiology, genetics, immunology.

The Dimopoulos Group ([www.dimopoulosgroup.org](http://www.dimopoulosgroup.org)) is affiliated to the Johns Hopkins Malaria Research Institute, Department of Molecular Microbiology & Immunology, Bloomberg School of Public Health, Johns Hopkins University. The institute and department have state-of-the-art facilities and comprise an excellent group of scientists with a broad range of interests and expertise in vector-borne infectious diseases. The institution provides an excellent environment for biomedical career development.

Please address enquires and applications (letter of personal and academic goals, CV, and contact information for two references) to George Dimopoulos ([gdimopo1@jhu.edu](mailto:gdimopo1@jhu.edu)).
